🧠 Skills

Languages & Frameworks

JavaScript, TypeScript, React.js, Next.js, React Native, Tailwind CSS

State Management

Jotai (atoms), Context API, Redux

Backend & APIs

Strapi CMS, REST APIs, Node.js API development

DevOps & Tools

NGINX reverse proxy, Postman, Bitbucket, GitHub, VS Code, Xcode

Others

- Google Maps API, Payment Gateway Integration, Push Notifications, Testing & Debugging, UI/UX Implementation

🎓 Education

Bachelor of Engineering (B.E), Karpaga Vinayaga College of Engineering & Technology

2016 – 2020

👤 Professional Summary

Software Developer with 3.5 years of experience in building scalable web and mobile applications using technologies like React.js, Next.js, and React Native. My expertise includes working with Strapi CMS and optimizing performance using advanced techniques such as SSR, SSG, and ISR. I'm currently focused on developing AI-powered solutions using OpenAI APIs to enhance user experiences

🛠 Experience

Software Developer, *Pickyourtrail*

08/2022 – Present | Chennai

- Maintained & Optimized Three Codebases: React.js SPA, Next.js v13 (Pages Router) with Stitches CSS, Next.js v15 (App Router + TypeScript) with Tailwind CSS
- Configured NGINX reverse proxy for seamless routing between codebases, improving scalability and maintainability.
- CMS Integration:

Integrated Strapi CMS for static/dynamic pages (home, landing pages, blog posts). Used Next.js SSG & ISR for SEO-friendly pages and faster load times.

- State Management:

Implemented Jotai for global & local state management in web and React Native apps, improving performance and reducing unnecessary renders.

- AI Chatbot Development:

Built an AI-powered itinerary builder for travel packages page using OpenAI API + Next.js + Node API. Designed conversational flow to collect user preferences and generate personalized travel itineraries.

- Performance Optimization:

Leveraged dynamic imports, image optimization, and prefetching to reduce bundle size and page load times by 30%.

- Cross-Platform Collaboration:

Coordinated with the mobile team to deliver consistent features across web and mobile apps.

🏆 Key Achievements

Delivered AI-driven chatbot feature that improved customer engagement on travel package pages.
